THE DERBY DAY IN ENGLAND. - List Wednesday ail England was excited and London made general holiday, it being Derby Day This race was started in 1780, to be run by three year-old horses, and was won by Sir Charles Bunbury's bay colt Diomed. It has been run yearly ever since, so that the contest decided on Wednesday will be the ninetieth. A writer adds: -

There is no event that excites such intense interest throughout all classes of English soci ety as the Derby. When the eventful day arrives, the spectacle on Epsom Downs is the most magnificent in the world. On an open space of about seventy-five acres are about half a million human beings.

The race course is shaped like a horse shoe. the upper or circular side being on considerably higher ground than the lower. The horses, starting at one end, race around, the distance being a mile and a haif. Within the semicircle of the track is a steep hill, on which the multitude assemble. Every kind of carriage under the sun is crammed in on this crowded hill.

On the grand stand the scene is less variegated but eminently exciting. The betting ring is crammed full of a mass of shricking, howling, perspiring human beings-the betting men. They rush about with frantic gestures, tumbling over each other in their eagerness to bet but when the bell rings for the beginning of the dash, all is silence. As the steeds near home the shouting begins, and for about a minute the uproar passes all comprehension. When the horses pass the winning post, the number of the winner is displayed, and in a twinkling the news is flashed through the civilized world. The following is the report by Atlantic ca-

ble of the first day's races: London, June 1. - The Derby of this year has not been excelled by any of its predecessors. The day was fine, the crowds immense. the race excited and closely contested, and the result unexpected. At sunset yesterday the people commenced moving to the scene, and up to noon to day the roads to the Downs were filled with unending streams on foot, on horseback, and in carriages. All the morning London highway was packed with a solid mass for four miles from the race course with vehicles of every description.

The scene from the grand stand just before the start was one of unusual splendor. A fringe of carriages from five to ten deep lined the entire circuit, and hundreds of thousands of spectators were crowded between them and the track. Present on the grand stand were the Prince and Princess of Wales, Prince Leopold and the King of Belgium, attended by a large and brilliant throng of the nobility and aristocracy, also many members of Parliament, cabinet ministers, representatives of the beach, and persons eminent in all departments of public life.

The track was cleared by mounted policemen with difficulty, but not far from the appointed time the horses were brought out. The excitement of the spectators was wrought to the highest pitch by the appearance of the fifteen horses entered for the race. McGregor, the favorite, was tremendously cheered. Betting differed little from that last night, being 700 to 400 on McGregor, 7 to 1 against Camel, and 20 to 1 against Kingeraft.

All being ready, a good start was obtained, and the horses dashed away. As McGregor began to fall behind the greatest astonishment was manifested. When Kinggraft took the lead the excitement was most intense, and reached its height when he came in winner, with Palmerston second, and Muster close behind. The race had hardly ended when a drenching shower fell, which lasted for a few moments, and was succeeded by the brightest sunshine. Kingeraft won the race in 2,45. The following is the summary; Lord Falmouth's b. c. Kingcatt, 1; W. S. Crawford's b. c. Palmerston, 2; Lord Wilton's Muster. 3 The Derby stakes were for fifty sovereigns

each, half forfeit, for colts 8 stone 10 pounds, and fillies 8 stone 5 pounds, three years old, the owner of the second horse to receive three hundred sovereigns, and the third one hundred and tifty sovereigns out of the stakes. Fifteen horses ran for the Derby stakes.

The government of Paraguay has made a demand upon Brazil for the surrender of Madame Lopez and the large amount of treasure alleged to be in her possession, on the ground that she was the accomplice of the Dictator of Paraguay. The Brazilian Minister, however, refuses to surrender Madame Lopez, and says that when she is released her accusers can take such steps as they may think fit in the courts of law, and can recover the damages out of the proceeds of the estates belonging to her, which have been seized by the provisional government of Paraguay. The Brazilian Minister also states that the effects of Madame Lopez, seized in her coach, were of no great value.

BETTENDORF has found a test so delicate that one part of arsenic in one million parts of solution may be detected, and the presence of antimony does not affect it. To apply this test the suspected liquid is mixed with hydrochloric acid until fumes are apparent. Chloride of tin is then added, and a basis precipitate containing the greater part of the arsenic as a metal mixed with the oxide of tin is thrown down.

Fully equal in every way to Bitter Quinine, And, like it, is the one Great, Positive and Unfailing CURE for all

DISEASES OF MALARIOUS ORIGIN. Fever and Ague, Intermittent Fover, Chill Fever, Remittent Fever,

Bilious Fever, Damb Ague. and the long train of disorders following those when neglected.

SWEET QUININE

s made solely from Peruvian Park (so is Bitter Quinine,) therefore it is of Vegetable origin, and not a Mineral Poison, but on the contrary is proved to be one of the elements found in the blood of all healthy persons.

SWEET QUININE acts as an antidote to, as well as a cure for, malarial or miasmatic poison, the absorption of which by the lungs causes Intermittent Fovers, etc. The only advantage claimed for

SWEET QUININE over the use of old Bitter Quinine is the entire absence of that intense, persistent bitterness, which in the latter is an insurmountable obstacle to its use with most persons, and always

with children. SWEET QUININE is in two forms-in Powder, for the use of Physicians and Druggists, and Fluid, for use in the
